

Quality and Environmental Policy

Latchmore Roofing is a business that operates in partnership with the building industry's leading manufacturers of technologically advanced materials and methods to provide and install roofing solutions for public and private, domestic, industrial and commercial markets.

We recognize the need to demonstrate effective quality and environmental management through a company wide commitment to continual improvement. This is demonstrated through all aspects of our work including our products and service delivery. We seek to minimize our significant environmental aspects, prevent pollution and to ensure compliance with all applicable legal and other requirements.

In support of this we have identified objectives to minimize waste sent to landfill using the 3R's (Reduce, Reuse and Recycle). We are also committed to reducing our utilities (Energy, water) usage and where appropriate making use of sustainable raw materials

To assist us with our stated aims we have implemented and will maintain an integrated management system that incorporates the requirements of ISO 9001:2008 and ISO 14001:2004. The system provides us with a means of monitoring and measuring our process and provides the framework for the setting of appropriate objectives and targets for quality and the environment. This integrated policy is available to the public via our website: www.latchmore-roofing.co.uk

David Chewter
Managing Director

A handwritten signature in black ink, appearing to read "D. Chewter", is positioned below the printed name and title.
